Pictures are used for illustrative purposes and actual vehicle may vary.

### Head Up Display [HUD]

The Head Up Display conveys vehicle information in full color above the meters for easy viewing. You can adjust image brightness and display height to suit your preference and time of day. The combiner extends or retracts when you turn the ignition.

### Power panoramic sunroof

The stylish twin sunroofs with outer sliding glass open up the atmosphere for the driver and all passengers. Each shade can be separately operated to let in refreshing sunlight.

### Electric Parking Brake with Brake Auto Hold

Simply pull the switch up to apply the parking brake or push the switch down to release it. If Brake Auto Hold is active, the vehicle will remain stationary even if you release the brake pedal. Pressing the accelerator releases the brakes.

### Heated seat

The driver's and front passenger's seats provide heaters in the cushions and seatbacks that can be activated or deactivated from easy-to-access switches.

### Keyless Operation System [KOS]

When carrying the key, you can press a button on the outside of the front doors or tailgate to lock or unlock all the doors and tailgate, and press the engine switch in the cockpit to start or stop the engine.

### Cruise control

Vehicle speed is automatically maintained without keeping your foot on the accelerator pedal, allowing more relaxed driving on extended journeys. Pressing the brake pedal disengages the system.

### Rockford Fosgate® premium sound system

Savor the stunning sound quality of a new audio system jointly developed with the Rockford Corporation. Nine speakers surround you with spectacular DTS Neural Surround™ sound.

Note: Rockford Fosgate® and associated logos are registered trademarks of Rockford Corporation in the United States and other countries. DTS Neural Surround™ is a trademark of DTS, Inc.

### Mitsubishi Multi Communication System [MMCS]

This central Wide VGA touch-screen makes navigation easy and keeps you clearly informed of ECO information such as energy consumption and driving range. It also displays the rear camera view whenever you reverse to lend a helping hand.

### Rear seat adjustment

The comfortable rear seats with -9step reclining and 200mm sliding adjustment can be slid all the way back for class-leading legroom. Even then, there is plenty of storage space in back and the 60:40 split seatbacks can be individually lowered for more.

### Slender side sills

The side sills are slender and protected from thrown up dirt by door garnishes while driving, so anyone can comfortably enter and exit the vehicle without rubbing their legs on the car and getting their clothes dirty.

### Tailgate window

The rear view is clear through the double rear windows with minimal interference from the height-adjustable rear headrests, which are specially designed to stay low while providing comfortable head support.

### Active Yaw Control [AYC] (for 2WD)

AYC brake control function for 2WD models enhances cornering performance by optimizing front brake force, allowing you to find the intended driving line. View the amount of force AYC is controlling through an indicator on your meter display.
